Self Assign by Individual Games is a new feature in GameOfficials.net. This basically allows you to set individual games to be eligible for Self-Assign rather than an entire age group or league.

To turn this on in your group, go to:

Group Setup : Assignor Settings : Edit Settings : Expand "Self-Assign Options" : Check the box next to "Allow Individual Games to be Self Assigned" : Save.

To make an individual game eligible for Self-Assign:

Main Menu : Assign " Game : Find game : Click on game number : Check box next to "Open for Self-Assign" : Save

A note should now appear on that game in blue letters stating "**Self-Assign Enabled**".

To disable it, simply go back into that game and uncheck the box.

This is a Pro Version feature.
