You can now send Group Emails to your officials via locations!

Group Maint : Msgs / News : Select "Officials" from the drop down bar

You will now see the option called "Zip Codes". You can list one or more zip codes in this box to limit the message to.

You can put partial matches as well like, "951,9581". That would send to anyone that a zip like 951XX or 9581X.
